My signature hereto signifies I am the owner/financially responsible party for job site compliance with the Stormwater Ordinance as outlined in Section 5.10 of the Unified Development Ordinance (UDO) and the Stormwater Design Manual Chapter 5. I hereby acknowledge that Best Management Practices must be used to ensure control of soil erosion on my job site to include, but not be limited to, the following:

1. Installation and regular maintenance of silt fencing using the preferred method of trenching installation on all low/down slope sides of the job site. Silt fence is to have an upslope return at each end no less than 5 feet; and
2. Installation and regular maintenance of a stone construction entrance. Stone construction entrance shall consist of a 2 inch to 3 inch coarse aggregate stone. Construction entrance shall be a minimum of 6 inches in thickness, 10 foot wide and extend to the structure or a minimum of 15 feet in length; and
3. Removal of mud and sediment from the street or adjacent property(ies) immediately following such an occurrence; and
4. Conduct no land disturbing activity within 35 feet of the banks of streams, lakes, wetlands or other water course or water body; and
5. Provide temporary vegetation and/or mulch on any exposed areas to provide an effective barrier from erosion within 14 days of inactivity; and
6. Install any other measures as deemed necessary by the Watershed Management Division Erosion and Sediment Control Program.
7. All construction site activities must adhere to the South Carolina Department of Health and Environmental Control (SCDHEC) General Permit SCR100000 for Large and Small Site Construction Activities.

I understand that if permanent stormwater controls are to be installed on my site, they must be installed and maintained in accordance with design standards as outlined in Chapter 4 of the Stormwater Design Manual. Should such controls be installed, I understand that I am required to file a signed Permanent Stormwater Maintenance and Responsibility Agreement with the Beaufort County Register of Deeds Office prior to project closeout.

I understand that if the disturbed area for any reason becomes greater than 1 acre or additional impervious surface exceeds 5,000 sqft., a formal Stormwater Management Plan (SWPPP) with an Erosion Control Plan will be required to be submitted with proper fees for review, approval, and permitting. I further acknowledge the Watershed Management Division may issue Notices of Violation, Stop Work Orders, and/or Civil Penalties for failure to comply with Sediment & Erosion Control Requirements.
