Town of Bluffton to Install Street Lights on Lawrence Street

The Town of Bluffton will begin installing street lights along Lawrence Street in Bluffton's Historic District. South Carolina Electric & Gas (SCE&G) and its subcontractors will begin work in early March and the project is scheduled to be completed in April. The Lawrence Street Lighting Enhancement Project will install 13 decorative street lights on Lawrence Street, between Wharf and Calhoun Streets.

The location of the street lights will alternate from the northern to the southern side of the road. Residents and businesses should expect minimal delays during construction. Traffic flow may be temporarily restricted to one-lane flow, as needed, with flag workers present to direct traffic through the construction zone. Please follow signs and directions from construction crew members. Access to all homes and businesses will remain available during the period of installation.

This project is a part of the Town's efforts to provide increased illumination along sidewalks and roadways to improve public safety and walkability within Bluffton's Historic District. The street lights will be lit from dusk until dawn.

For more information about the Lawrence Street Lighting Enhancement Project, contact Bryan McIlwee, the Town's director of engineering, at (843) 706-7824 or bmcilwee@townofbluffton.com.
