Retrofit of Pine Ridge Lagoons Begins Monday, February 22

The irrigation portion of the Pine Ridge Retrofit project will begin on Monday, February 22 and is expected to be completed in May. Sediment and erosion control fencing will be installed on Monday, February 22, with trench work beginning toward the end of the week. No significant impacts to the neighborhood are expected.

The Pine Ridge Retrofit is a priority project identified in the May River Watershed Action Plan. The project is partially funded through a \$290,000 grant from Environmental Protection Agency Clean Water Act 319. South Carolina-based Willow Tree Landscaping will perform the work of retrofitting several lagoons in the Pine Ridge neighborhood to reduce the amount of stormwater entering the May River.
